

A global organization at your service

JBC is a global company with a distributor network spanning 5 continents that guarantees a solid commercial organization with quick and efficient service.

The power of experience

More than 90 years of experience have placed JBC at the technological forefront of tools for soldering and rework operations in electronics. Innovation, efficiency and reliability are the key features of a wide range of products which have been designed to satisfy the most demanding requirements of professionals.

High technology, superior quality

Product perfection is one of the main objectives of JBC's improvement and development program.

The R&D department has created the most innovative soldering technologies, which JBC is proud to present in this catalogue.

ESD safe

All JBC products comply with CE standards and ESD recommendations.

JBC Technology

Most Efficient Soldering System

JBC Stations work with JBC Most Efficient Soldering System, which recovers tip temperature extremely quickly. This increases work efficiency and allows the user to work with lower temperatures.

Efficient Temperature Control Comparative process of 3 solder joints

Tips with JBC Technology only drop 30°C (54°F) where others drop as much as 70°C (126°F).

Productivity

Short tip-to-sensor distance ensures extremely quick temperature recovery and an accurate control.

Heating System Principles 350°C/662°F in 2 seconds

the equivalent cartridges of the best competitor

Intelligent Heat Management

Thanks to automatic detection of the tool in the stand, JBC Soldering & Rework Stations allow the tools to enter Sleep & Hibernation Modes when not being used. As a result, tip life lasts up to 5 times longer.

Sleep Mode

Sleep Mode automatically lowers tip temperature below the solder melting point when the tool rests in the stand. It prevents the dissolution of the iron tip coating into molten solder.

Hibernation Mode

After a configurable period of tool inactivity in the stand, the tool enters Hibernation Mode. It cuts off the power supply making the tip reach room temperature, thus preventing oxidation and saving energy.

Longer Tip life

Tip life increases exponentially by using lower temperatures as shown. Using Sleep Mode, the temperature is further reduced, which multiplies tip life by 5.

Cartridges with long life & extended tip life

The essential part of the soldering iron is the tip. Therefore, JBC has over 500 cartridge models of different shapes and sizes to choose from, depending on each application. JBC has developed the most advanced technology based on the following principles:

Excellent Heat Transfer The compact element

reduces thermal barriers.

Instantaneous Heating A fully-integrated thermal sensor in the heater ensures quick temperature recovery.

Great Durability The intelligent algorithm control program extends tip life.

sac@tch.es 956 20 11 12

When you start working do not forget:

Bigger is better

The bigger the solder tip, the better the thermal transfer. Select the tip that has the greatest contact area.

Over 500 tips of different sizes, shapes and power

JBC Cartridges range from models for precision work to high power requirement applications.

Geometry Slimness vs Efficiency

A tip with high-thermal efficiency makes your job up to **40% faster** than a tip with a slimmer geometry.

Increase the contact surface Tip - Application

The bigger the contact surface that the tip has with the application, the higher the **thermal transfer**.

Largest mass possible

The more mass the tip has, the more heat is accumulated and the **lower is the temperature drop**.

Maintain tip surface clean and tinned

Remember that rusty and dirty surfaces reduce **heat transfer** to the solder joint.

(See JBC's cleaning methods on pages 8-9).

This way you will be able to:

- Work at lower temperatures (350°C / 662°F).
- Obtain better results in less time.
- Improve thermal performance.
- Increase temperature precision.
- Reduce collateral damage (thermal shock on components and PCBs).

Factors limiting tip life

Working temperature

The higher the temperature, the greater the oxidation and corrosion. Work with the **lowest possible temperature** and choose the tip with the greatest contact area for each application. **Use thermally efficient tools** and keep tips clean of oxidation.

Correct techniques

Too much pressure on the surface to solder can cause tip or plate breakage. Do not use the tip as a pointed object or a screwdriver. Choose the right temperature and tip shape for each application.

Iron plate thickness

Iron plate wear shortens tip life by hollowing tips out. Do not use mechanical or chemical means to clean the tip. Use the cleaning methods provided by the manufacturer - such as brass wool, automatic tip cleaner or sponges.

Oxidization

An oxidized soldering iron does neither wet nor transfer heat well (dewetting). The higher the temperature, the greater the risk of oxidation. Always keep tips tinned while not in use and take advantage of JBC Sleep & Hibernation Modes.

Flux and solder alloy

Too much active flux can cause corrosion. IPC recommends: ROL, REL and ORL. Flux quantity inside small diameter solder wires might not be enough. Provide compatible external flux if necessary.

Remember:

- Work with the lowest possible temperature.
- Use thermally efficient tools.
- Choose the right temperature and tip shape for each application.
- IPC recommends: ROL, REL and ORL.
- Always keep tips tinned while not in use.
- Take advantage of JBC Sleep & Hibernation Modes.
- on the surface to solder can cause tip or plate breakage.
- Use the cleaning methods provided by the manufacturer.

| |-----

Cleaning Systems

For good thermal transfer, keep the tip tinned thus free from oxides.

Clean the tip in less than a second

With automatic cleaners you save time and optimize production.

A clean tip is always easier to tin, resulting in higher

CL Manual Tip Cleaner

A complete cleaning system with splashguard and antisplash membrane to keep the workspace clean and free of solder particles.

start by pushing the button or by selecting the continuous mode.

Cleaning Methods

CL6210

Brass Wool

Very effective cleaning method. It leaves a small layer of solder on the tip to prevent oxidation between cleaning and rewetting.

Sponge

The least harmful cleaning method. Keep the sponge moist with distilled water when working to avoid tip wear.

Improve heat transfer

quality solder joints.

CLMS Automatic Junior Tip Cleaner with Fiber Brushes (non-metal)

The ideal partner to any soldering station.

Two modes of operation

The motorized brushes

Save space

You can easily fit the tip cleaner into your workspace thanks to its reduced size.

Brushes

CL4008

Fiber Brushes

The composition, size and thickness of the fibers ensure the most efficient cleaning and the least damage while cleaning the tip.

Automatic Tip Cleaners

CLMUP

Automatic Tip Cleaner with Fiber Brushes (non-metal) Perform a thorough and gentle tip cleaning increasing heat transfer and maximizing the soldering quality.

CLMU

Automatic Tip Cleaner with Metal Brushes Perform a thorough and strong cleaning to recover the tip increasing heat transfer. The metal brushes supplied provide a deep cleaning.

Sensor Mode

The sensor triggers brush rotation when tip approaches and automatically stops when the tip is removed.

Vertical position

It also features a second position which facilitates vertical tip access.

Keep your workspace clean The locking mechanism on the brushes makes them fast and easy to replace.

The solder collector tray can be easily emptied.

Brushes

CL2008 / CL2007

Fiber Brushes provide a soft cleaning, especially recommended for regular usage to improve tip life. Supplied with CLMUP.

CL1008 / CL1007

Metal Brushes provide a thorough cleaning to recover the tip, increasing heat transfer Supplied with CLMU.

Ref.	Description	Image and dimensions	Suggested components	Compatible with
C245804	Conical Bent Cartridge Ø 1 mm L Ø 0.039 in	9.5 (0.374)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245673	Chisel Cartridge 0.8 x 0.3 mm L 0.031 x 0.011 in	10 (0.394) (0.394) (0.394) (m)	Package 0805 Through-hole	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245806	Chisel Cartridge 1.2 x 0.7 mm L 0.047 x 0.028 in	10 (0.394) 10 2000 x 2700 2000 x 2700 (m)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245844	Chisel Cartridge 1.8 x 0.8 mm L 0.071 x 0.031 in	13.5 (0.531) (1.500 × 1.100) (1.500 × 1.100) (1.500 × 1.100) (1.500 × 1.100)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245807	Chisel Cartridge 2.2 x 1 mm L 0.087 x 0.039 in	10 (0.394) (0.394) (mm (in)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245261	Chisel Cartridge 3 x 1 mm L 0.118 x 0.039 in	15 (0.591) (6.600 × 811 0) (6.700 × 811 0) (6.700 × 811 0) (6.700 × 811 0)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245811	Chisel Cartridge 3.2 x 1.2 mm L 0.125 x 0.047 in	10 (0.394) (0.394) (mm) (in)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N
C245808	Chisel Cartridge 4.8 x 1.5 mm HT L 0.189 x 0.059 in	7 (0.276) (689 x 0.000 x 681 0) (69) (7) x 681 0) (69) (7) x 681 0) (69) (7) x 681 0) (7) x 681 0) (8) x 681 0)	General use	Stations: CDB, CDEB, DI, DDE, DME Tools: T245, T245G, T245P, T245N

C245L Longer Cartridge Range for T245 General Purpose Handles

C245E Extended Tip Life Cartridge Range for T245 General Purpose Handles C245E Cartridges have a reinforced protection on the tip that provides a longer life with a small reduction of thermal efficiency.
